

Installing Ubuntu MATE 18.04 through LiveCD with preinstalled myCNC software

- The LiveCD image can either be burned onto a DVD, or written on a USB disk through the use of [Etcher](#) or [Rufus](#) software. The LiveCD installation packages can be downloaded [here](#).
- Connect the power cable, the screen through an HDMI or VGA cable, keyboard, mouse and the LiveCD with Ubuntu Mate 16.04 to the computer
- When booting up the computer, hold the **Delete** key to enter the BIOS

- In the BIOS screen, navigate to the **Boot** tab

- Select the **Hard Drive BBS Priorities**
- For **Boot Option #1**, switch the SSD 32GB to KingstonDT 101 G2 PMAP

- Save & Exit by pressing F10. The boot-up will begin shortly
- In the pop-up window, select the **Install Ubuntu MATE** option

- Select **Normal Installation**, and check the **Install third-party software** checkmark on the next screen

- Select the **Erase disk and install Ubuntu MATE** option if you want to format the Windows partition, leaving only Ubuntu MATE on the computer

- Select your timezone
- In the *Who are you?* screen, use **mycnc** as the username to access the presets that are applied during the installation. These presets include the **mycnc** user in groups such as dialout (access to scanners), sudo (security privileges of superuser), and sambashare (SMB/CIFS networking protocol for Windows). NOTE: These presets are strongly recommended for novice users.
- Select the **Log in automatically** option

The installation of Ubuntu MATE will begin momentarily.
